

Gerald F. Wu

COMPUTER SCIENCE · APPLIED MATHEMATICS

☎ 571-730-7934 | ✉ 2017gwu@gmail.com | 🏠 geraldwu.com | 📱 98WuG | 📺 98WuG

Skills

Programming: Java, C, Scala, C++, OCaml, Racket, Python, Processing, Shell scripting

Web: JQuery/JavaScript, ASP Classic, PHP, LAMP, HTML/CSS

Other: RHCSA Certified Linux Systems Administration, Docker, LaTeX, Git

Education

Brown University

Providence, RI

MAJOR: COMPUTER SCIENCE, APPLIED MATH

2017 - PRESENT

CURRENT **CS**, Introduction to Systems | Database Management Systems

CURRENT **Applied Math**, Applied Partial Differential Equations II | Statistical Inference I

2017-2018 **CS**, An Integrated Introduction I | An Integrated Introduction II

2017-2018 **Applied Math**, Applied Ordinary Differential Equations | Applied Partial Differential Equations I

2017-2018 **Math**, Honors Calculus (Multivariable) | Honors Linear Algebra | Abstract Algebra

Thomas Jefferson High School for Science and Technology

Alexandria, VA

HIGH SCHOOL EDUCATION

2013 - 2017

- GPA: 4.37 – AP Computer Science with Data Structures, Parallel Computing, Computer Systems Research

Experience

Brown University

Providence, RI

APPLIED MATHEMATICS TEACHING ASSISTANT

Sep. 2018 - PRESENT

- Undergraduate teaching assistant for APMA 0340: Methods of Applied Mathematics II. This course covers both **non-linear ordinary differential equations** and **partial differential equations** from an applied mathematics perspective.

FMS Inc.

McLean, VA

SOFTWARE ENGINEERING INTERN

May 2018 - Aug. 2018

- Cluster analysis in large-scale graphs (C#)
 - Researched, implemented, and **optimized** the **Markov Clustering Algorithm** (MCL) to identify clusters in relational graphs of size **100,000+** nodes and **120,000+** edges in less than **10 minutes**
- Implemented secure, PCI-compliant payment integration on the web using Authorize.Net (ASP Classic)
 - Complete integration with the **Authorize.Net** payment gateway, including both **one-time** payments and long-term customer **payment profiles**

Smithsonian Institution

Washington D.C.

SOFTWARE ENGINEERING INTERN

Jun. 2016 - Aug. 2016

- Metadata extraction tool (Java/shell scripts)
 - Reads **metadata** from files in an ingest folder and populates an **Oracle database** with the data
- Metadata ingestion tool (Java)
 - Automatically processes **spreadsheets** within ingest folders and populates **Oracle database**

Smithsonian Institution

Washington D.C.

SOFTWARE ENGINEERING INTERN

Jun. 2015 - Aug. 2015

- Two-part data integrity program for Smithsonian Digital Asset Management System
 - Ingests **MD5 checksum** data and writes it to an Oracle database, and **verifies data integrity** at a later date

Projects

Quantum Mechanical Wave Function Propagation

Processing

GITHUB.COM/98WUG/QUANTUMEVOLUTION

- A program to evolve arbitrary initial states through time for the one-dimensional Schrodinger Equation and Wave Equation in the absence of a potential field. Highly optimized to run in **real time**. Accurate to millions of timesteps before noticeable error propagation.

An Approximate Solution to the Packing Problem

C++

GITHUB.COM/98WUG/SENIORRESEARCH

- An approximate, polynomial time solution to the classic NP-hard packing problem. Implemented using the sorting-first greedy approach to packing.
