# Gerald F. Wu

COMPUTER SCIENCE · APPLIED MATHEMATHICS

□ 571-730-7934 1 🛅 98WuG | 🖸 98WuG

Skills\_

**Programming:** Java, C, Scala, C++, OCaml, Racket, Python, Processing, Shell scripting

Web: JQuery/JavaScript, ASP Classic, PHP, LAMP, HTML/CSS Other: RHCSA Certified Linux Systems Administration, LaTeX, Git

**Education** 

**Brown University** Providence, RI

MAJOR: COMPUTER SCIENCE, APPLIED MATH

2017 - PRESENT

CURRENT CS, Introduction to Systems | Database Management Systems

Applied Math, Applied Partial Differential Equations II | Statistical Inference I CURRENT

CS, An Integrated Introduction I | An Integrated Introduction II 2017-2018

Applied Math, Applied Ordinary Differential Equations | Applied Partial Differential Equations I 2017-2018

Math, Honors Calculus (Multivariable) | Honors Linear Algebra | Abstract Algebra

Thomas Jefferson High School for Science and Technology

Alexandria, VA

2013 - 2017

**HIGH SCHOOL EDUCATION** 

GPA: 4.37 – AP Computer Science with Data Structures, Parallel Computing, Computer Systems Research

**Experience** 

**Brown University** Providence, RI

APPLIED MATHEMATICS TEACHING ASSISTANT

Sep. 2018 - PRESENT

• Undergraduate teaching assistant for APMA 0340: Applied Differential Equations II

FMS Inc. McLean, VA

SOFTWARE ENGINEERING INTERN

May 2018 - Aug. 2018

- Cluster analysis in large-scale graphs (C#)
  - Researched, implemented, and optimized the Markov Clustering Algorithm (MCL) to identify clusters in relational graphs of size 100,000+ nodes and 120,000+ edges in less than 10 minutes
- Implemented secure, PCI-compliant payment integration on the web using Authorize. Net (ASP Classic)
  - Complete integration with the Authorize. Net payment gateway, including both one-time payments and longterm customer payment profiles

#### **Smithsonian Institution**

Washington D.C. Jun. 2016 - Aug. 2016

SOFTWARE ENGINEERING INTERN

- Metadata extraction tool (Java/shell scripts)
  - Reads metadata from files in an ingest folder and populates an Oracle database with the data
- Metadata ingestion tool (Java)
  - Automatically processes spreadsheets within ingest folders and populates Oracle database

#### **Smithsonian Institution**

Washington D.C.

SOFTWARE ENGINEERING INTERN

Jun. 2015 - Aug. 2015

- Two-part data integrity program for Smithsonian Digital Asset Management System
  - Ingests MD5 checksum data and writes it to an Oracle database, and verifies data integrity at a later date

**Projects** 

### Quantum Mechanical Wave Function Propagation

**Processing** 

GITHUB.COM/98WuG/QUANTUMEVOLUTION

· A program to evolve arbitrary initial states through time for the one-dimensional Schrodinger Equation and Wave Equation in the absence of a potential field. Highly optimized to run in real time. Accurate to millions of timesteps before noticeable error propagation.

## An Approximate Solution to the Packing Problem

C++

GITHUB.COM/98WUG/SENIORRESEARCH

 An approximate, polynomial time solution to the classic NP-hard packing problem. Implemented using the sortingfirst greedy approach to packing.
